A train runs from city A to city B in one hour. Find the distance from A to B. 9. Last year John grew 2 inches, and this year he has grown 3 inches. How tall is John? An Exercise in Estimating Results Often in life you can use your knowledge of arithmetic in checking your answer to a given question. This exercise illustrates this type of problem solving. On a sheet of paper put in a column the numbers of these problems from 1 to 6, leaving a little room between the numbers for your work. The answer to these problems is either Yes or No. Read the problem carefully. When you have decided on the answer write it after the number of the problem on your paper. Then check your answer by solving the problem. 1. If oranges sell at the rate of 3 for 100, can you buy as many as 10 for 400? The right answer is Yes; therefore write Yes opposite No. 1 on your paper. This is the way to check your answer. Check.--The number bought for 40c =  $X3=12$ . 2. I went to the store with a five dollar bill. If I purchased \$3.50 worth of groceries, could I buy as much as 20 pounds of...
