

Randomized Parallel Algorithms for Trapezoidal Diagrams (Classic Reprint) (Paperback)

By Kenneth L Clarkson

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Randomized Parallel Algorithms for Trapezoidal Diagrams We describe randomized parallel Crew Pram algorithms for building trapezoidal diagrams of line segments in the plane. For general segments, we give an algorithm requiring optimal $O(A + n \log n)$ expected work and optimal $O(\log n)$ time, where A is the number intersecting pairs of segments. If the segments form a simple chain, we give an algorithm requiring optimal $O(n)$ expected work and $O(\log n \log \log n \log^* n)$ expected time, and a simpler algorithm requiring $O(n \log^* n)$ expected operations. For a set of segments forming K chains, we give an algorithm requiring $O(A + n \log^* n + K \log n)$ expected work and $O(\log n \log \log n \log^* n)$ expected time. The parallel time bounds require the assumption that enough processors are available, with processor allocations every $\log n$ steps. 1. Introduction 1.1 Results and related work We give several algorithms for building trapezoidal diagrams of line segments in the plane. These algorithms reach or approach optimality with respect to three parameters: the...

Reviews

A fresh e-book with a brand new perspective. This is certainly for anyone who statte that there had not been a really worth reading. I am just happy to explain how this is the very best publication i have go through in my individual lifestyle and may be he best pdf for ever.

-- Margarett Roob

The very best publication i possibly study. This is certainly for anyone who statte there was not a worth looking at. I am just very happy to tell you that this is basically the best pdf i actually have study inside my individual life and could be he very best pdf for possibly.
