Ballistics (Paperback)

By Alston Hamilton

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 Excerpt: .cent. For a general formula, then, we may use the fraction k, and then, assume for particular classes of localities, a mean value of k, provided the variation of humidity in any proposed class of localities is not too great. Using the general value, k of the humidity, we may correct the reading of the barometer so that it may be used in the formula for density, as follows: Let p be the reading that would, if produced by dry air, pertain to the actual density for which a barometric reading p is recorded; then, pv being the vapor-pressure at the time, $P = P. + Pv = P-fPv = P-kF$ (4) For a barometric pressure p , for dry air, we have from (2) d p 492 lb) Using with this formula the values of the readings for standard conditions; viz: bar: 29.5275; ther. 59;...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
