GRIN Verlag Dez 2009, 2009. Taschenbuch. Book Condition: Neu. 210x148x3 mm. This item is printed on demand - Print on Demand Neuware - Scholarly Research Paper from the year 2009 in the subject Environmental Sciences, grade: 2, University of Applied Sciences Essen, language: English, abstract: Today the head of states of most countries are aware of the fact that the human-based greenhouse effect is one of the main reasons for global warming and the melting of the ice at the poles. Furthermore they have realized that this will lead to more natural catastrophes, than have already occurred. The scope of the present assignment is to point out what the international climate politics for reducing the human-based greenhouse effect and what is the status quo of emission reduction measures are. Therefore chapter one highlights the fundamentals of the greenhouse effect and which gases trigger it. Especially the carbon dioxide emissions lead to an increased warming of the earth with an amount of 9-26 per cent. The main cause for the greenhouse effect with approximately 50 per cent is the burning of fossil energy sources like petrol or wood. Chapter two characterizes the development of international climate politics. Beginning in the year 1979 at the first world climate summit a worldwide binding climate protection was first passed in December 1997 when the United Nations established a protocol at the Nations Conference in Kyoto which has the aim to stabilize the amount of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system 1. The protocol establishes legally binding commitments for the reduction of greenhouse gases. So far 183 states have ratified the protocol. Furthermore three different Kyoto Mechanisms will be explained, that are to help to achieve the agreed climate goals. One of...
