There has been naturally more low grades to be handled, but the increase between a 96 and 97 sugar has not been sufficient to cause any disturbance. There has been a very decided retrogression in the size of grain in the commercial sugars from a largo number of factories. It is charitable to presume that this has resulted from the generally disturbed conditions in the factories following irregular cane supplies and stoppages, quality of labor, etc. But this Committee is more inclined to believe that it is primarily due to either carelessness or lack of interest in those responsible. It is strongly urged that every effort should be made towards producing a sugar with less small grain than obtains in the majority of factories at present. BY-PRODUCTS. Press Cake. Due to labor conditions, the advantages of press cake as fertilizer have been largely lost, many irrigated plantations finding it necessary to get rid of it by distributing it in irrigation water. It doubtless has some usefulness when disposed of in this way, but nothing approaching the benefits following application before cultivation. Molasses. The Maui Agricultural Company has introduced several important changes in its plant for making alcohol, increasing the capacity at small cost. Several alcohol distilling plants are being considered in other plantations. The unsatisfactory nature of the molasses sales to the Coast should encourage its utilization in some manner locally. At Kahuku Plantation factory, the method...
